

Guideline VOSSO - change retrieve direction.

No tools required.

- Loosen the spool cap and take out the spool from the reel frame.
- Unscrew the upper ring of the brake housing, the ring with diagonal relief grips.
- Carefully lift the upper part of the brake house and take it off.
- The hexagon silver colored one-way bearing is now exposed.
- Carefully pull the one-way bearing straight up, turn it upside down and put it back in the same place.
- Reinstall everything into the brake housing and remount the spool. All done!
